

## ENVIRONMENTAL POLICY OF THE MVM LTD.

The core tasks of MVM Ltd. include strategic planning and the central management and supervision of the companies within the MVM Group. MVM Ltd. operates a certified environmental management system that forms an integral part of its efficient decision-making process, which is harmonised with its strategy.

The management of MVM Ltd. is convinced that by meeting the targets set out in its environmental policy, the company will contribute to reducing the impact on our environment while increasing the company's economic efficiency.

In order to comply with the above, MVM Ltd. commits to:

- support the introduction and development of environmental management systems in the companies of the MVM Group;
- meet the environmental requirements set out in national and EU legislation and strive to comply with environmental expectations for the future;
- manage used and waste materials and equipment in the course of its activities, taking into account all environmental regulations;
- strive to achieve energy efficiency, through the optimal use of resources, reducing and maintaining low environmental impact by introducing new technologies and methods, continuously optimising and improving existing ones, continuously phasing out obsolete ones, and continuously improving its environmental performance;
- use the best available environmentally friendly technologies in its activities and investments, in compliance with environmental legislations, and seek to improve technologies that fall short of the required level by applying the Best Available Techniques (BATs);
- exercise the utmost care in the remediation, reclamation and recovery of sites that have ceased normal operations;
- promote the widespread use of environmentally friendly, carbon-neutral, alternative technologies and processes, the mitigation of environmental impact and replacement of high-carbon emitting technologies and the promotion of energy-efficient and environmentally conscious methods of energy use;
- enhance the professional skills of its staff and their commitment to environmental protection and a sustainable economy through regular environmental centered communication and information exchange, training, programmes and opportunities to exchange experience;
- liaise with regulatory and supervisory authorities, international and national environmental organisations and other stakeholders, emphasizing attention on the proper fulfilment of data and information reporting obligations;
- support research and development activities related to its activities in support of the environment and a sustainable economy, taking into account the importance of cost-effectiveness;
- in line with international expectations and in order to increase transparency, define and publish new trackable indicators of sustainability performance in the ESG framework;
- regularly inform the public about its sustainability performance and impacts on environment through an Integrated ESG Report available on its website.

MVM Ltd. regularly reviews its compliance with its environmental policy, continuously strives for improvements based on the assessments, and makes its environmental policy available.

Budapest, 26 May 2023

Károly Tamás Mátrai  
CEO  
MVM Ltd.
